

USER ID and PASSWORD Program

```
#include <iostream>

using namespace std;

int main()
{
    string userid, password;

    cout << "Enter User ID: ";
    cin >> userid;

    cout << "Enter Password: ";
    cin >> password;

    if (userid == "admin" && password == "12345")
    {
        cout << "User ID and Password are correct.";
    }
    else
    {
        cout << "User ID or Password is incorrect.";
    }

    return 0;
}
```
